A HELMET IS A PROTECTIVE HEADGEAR DESIGNED TO SAFEGUARD THE WEARER'S HEAD FROM INJURY DURING VARIOUS ACTIVITIES. IT CONSISTS OF A HARD OUTER SHELL, AN IMPACT-ABSORBING LINER, INTERIOR PADDING FOR COMFORT, AND A RETENTION SYSTEM (LIKE STRAPS) TO KEEP IT SECURELY ON THE HEAD. HELMETS ARE USED IN MOTORCYCLING, CYCLING, SPORTS, CONSTRUCTION, AND MILITARY/LAW ENFORCEMENT. THEY HELP REDUCE THE RISK OF HEAD TRAUMA BY ABSORBING IMPACT ENERGY AND PROVIDING A BARRIER AGAINST EXTERNAL HAZARDS. PROPER FIT AND ADHERENCE TO SAFETY STANDARDS ARE CRUCIAL FOR ENSURING A HELMET'S EFFECTIVENESS IN PROTECTING THE WEARER.
